ODBC connectivity included	×	×	×	×	✓

Notes

- (1) All prices reflect QBGarage.com's affiliate or ProAdvisor discounts where applicable. Prices for Pro and Premier are for single-user licenses; for Enterprise Solutions, the price is for a 5 user license, the minimum available. Online Edition Plus 10 user costs \$29.97/month, and 25 user costs \$47.97/month. All prices and specifications are subject to change without notice.
- (2) The lowest cost for an additional user for Pro and Premier is based on our discounted price for the 3 user license. The lowest cost for an additional user of Online Edition Plus is based on the jump from 10 to 25 users.
- (3) For Online Edition Basic, email support is available with an expected response within 24 hours. For Online Edition Plus, chat and email support are available, in addition to call back support with an expected response within 30 minutes. For QBGarage.com customers with Pro, Premier, or Enterprise solutions, email support is free. Intuit charges \$299 per year for a support plan for Pro.
- (4) Intuit provides maintenance releases for current versions of Pro, Premier, and Enterprise Solutions at no charge.
- (5) Pro, Premier, and Enterprise Solutions include a software feature for automatic backups, but it's up to the user to configure and use the backup feature, including making backups to different media or hardware.
- (6) Jobs already created in an existing desktop version of QuickBooks become sub-customers in Online Edition.
- (7) In Pro, Premier, or Enterprise Solutions, delayed billing can be accomplished by dating invoices in the future.
- (8) The desktop versions of QuickBooks include the ability to pay bills online provided the company's financial institution supports that function.
- (9) QuickBooks desktop software includes the tools necessary to manage employees and payroll. However, these tools do not automatically generate tax tables or provide the ability to pay employees by direct deposit. Those features require an extra cost subscription to either Basic, Enhanced, or Assisted Payroll.
- (10) The invoice and statement customization features of Pro, Premier, and Enterprise Solutions are more advanced than those available for Online Edition Plus.
- (11) Online Edition Plus has the ability to assign a location to transactions and to call that location by 1 of 7 pre-defined labels. This is in addition to the class tracking feature. In the desktop edition, the class tracking feature could be used to track locations, but class tracking can only be used to track one aspect of a business.
- (12) Online Edition Plus and the desktop versions both offer custom fields, but they are used in different ways. In Online Edition Plus, up to 3 custom fields can be added to certain transactions (estimates, invoices, sales receipts, refunds, and credit memos). In the desktop software, custom fields can be applied to certain list items: a mix of customers (jobs), vendors, or employees.
- (13) Online Edition has an audit trail, but it's called an activity log. For the QuickBooks desktop version, in addition to the audit trail, there's a transaction log that tracks changes since the last time a company file was backed up. The transaction log is created if at least some verification was performed when the backup was created. The transaction log file has the same name as the company file, but with a .qbw.tlg extension.
